Taking ASVAB Prepares You for Career Planning or Military Enlistment

The Services Vocational Aptitude Battery (ASVAB) is a test for high school students taken in the 10th-12th grade and to post-secondary students. Participation is ALWAYS voluntary. The program helps students, who often over-or-under represent their abilities, to accurately identify their strengths. Career Exploration Program (CEP) is not just for students interested in the military, the program has something for everyone who wished to access career exploration information .

At Mar Vista on October 11th while the 10th and 11th graders take the PSAT, the 12th graders will have the opportunity to take the ASVAB. If you are interested in taking it, please sign up on the link below.
